## Work History

**Facility Safety Manager**, 11/2021 – Present

**Reworld** – Conshohocken, PA

- Actively lead in the management of the facility's health and safety programs, processes, and policies.
- Monitor regulatory compliance, compliance with Covanta safety program requirements, accident investigation and documentation, OSHA VPP efforts, and safety training.
- Implement, motivate, educate, and enforce Covanta's safety and health policies.
- Manage the safety training program and ensure training is completed on applicable safety bulletins, memos, Safety Alerts, safety and health procedures/programs, etc.
- With facility management, oversee contractor safety and health performance. Ensure contractors are properly trained, use appropriate tools and equipment, and protect all employees from injury.
- Continually monitor the performance and effectiveness of the facility safety program and implement adjustments and improvements as needed.
- Manage all aspects of our safety reporting and maintain the facility safety and health records. Including electrical qualifications, LOTO, Confined space, Industrial Hygiene, and others.
- Work with plant personnel to secure accident scenes when appropriate, ensure the medical treatment of affected employee and/or contract employee, and investigate near miss, first aid, recordable injuries, on site vehicle incidents or incidents related to plant vehicles, and general safety concerns. Assist/Coordinate recommendations for corrective actions and track to completion. Manage accident investigations, root cause analyses, and related reporting.
- Work with plant personnel and contractors to ensure fire system inspection, testing, and functionality.
- Primary contact with the plant's health clinic. Schedule annual physical exams, hearing tests, and/or respirator evaluations.
- Manage all documentation and recordkeeping through personnel files, inspection forms, and other items.

## **EHS/Insurance Coordinator, 01/2021 to 11/2021**

### **Hankin Group – Exton, PA**

- Prepares and maintains safety training manuals, reports, and data sheets and coordinates all safety training.
- Influence, lead, and support all aspects of the safety program with field employees.
- Ensures compliance with all regulatory agencies and standards.
- Performs all job and site inspections with outside compliance.
- Conducts monthly safety committee meetings.
- Review subcontractors' safety programs for compliance.
- Oversees environmental safety initiatives.
- Oversees insurance administration: Formulates and implements processes for internal monitoring of certificates of insurance for vendors, subcontractors, and tenants.
- Acts as liaison between the company, insurance providers, agents and claimants and legal consultants.
- Reviews and submits all claims to carriers, oversees all claims to completion and maintains monthly claims report.

## **Branch Safety Inspector, 05/2019 to 01/2021**

### **Centimark Corporation – King of Prussia, PA**

- Perform safety inspections on all crews to ensure compliance
- Set up fall protection, pre-job inspections, and job planning meetings
- Conduct monthly and quarterly safety trainings with staff
- Responsible for maintaining safety standards at multiple jobsites throughout the eastern region (Pennsylvania, New Jersey, Delaware)
- Influence and provide knowledge to crew members to maintain safe working conditions
- Identify accident causes and optimal prevention strategies by conducting thorough investigations and analysis on safety issues or near misses
- Eliminate dangerous behaviors potentially impacting worker safety in roofing settings through applying industry best practices and process optimization
